

Experts in delivering secure, resilient cyber security services

Keeping your systems and data safe

With the threat landscape continuously changing, your organisation must be ready for anything. We believe it's vital to have the right processes, competence, and expertise to anticipate, prevent, and deliver counter measures before attacks happen.

Our cyber security capabilities

Why we are experts

Scan here to find out more

Over 34 years' experience of structured delivery of transformation projects across large, complex IT estates

We operate in compliance with professional standards and are certified under ISO 9001, ISO 27001, and ISO 27017. Additionally, we hold Cyber Essentials Plus certification

We are an NCSC Assured Cyber Consultancy

Our people have been awarded Chartered and Principal status by the UK Cyber Security Council, as well as being accredited with ISACA, ISC2, and CREST

Advanced data modelling

Revolutionising defence logistics, our advanced Digital Twin solution mapped complex supply chains, providing unprecedented insights and enabling proactive risk management across global supplier networks

Identifying critical threats

An education organisation required a unified security ecosystem that detects, responds to, and recovers from cyber threats – fast, to prevent attacks from damaging the business

For more info scan here

Implementing a Cyber Security Management System

We implemented a Cyber Security Management System (CSMS) to help WrightBus achieve UNECE-155 compliance, securing vehicle type approval and maintaining market presence in the transportation industry
